

Back-End Operations Partnership Proposal

VirtuPro as your invisible back-end operations engine

Prepared for Sem V — Founder	Partnership VirtuPro as back-end operations partner	Date 22 July 2026	Pilot start Pilot unit — Binghatti Apex
--	---	-----------------------------	---

Thanks for a great conversation today, Sem. This sets out how VirtuPro will act as the back-end operations engine for your business — running your day-to-day operations quietly behind your brand, so owners and guests only ever see you, while we carry the operational load. It's built to scale with your pipeline, from the pilot unit to 50+ properties.

The Partnership Model

- You are the client-facing brand and manager — you own the owner relationships, collect revenue, take your 15%, and pay owners.
- VirtuPro is your invisible back-end team. We operate under your brand via direct account access, so nothing about the guest or owner experience points back to us.
- You keep strategy, owner relationships, and dynamic pricing. We run everything operational underneath it.

Scope of Service

What VirtuPro handles

- 24/7 guest communication and review management — under a 10-minute response SLA (avg 2.5–3 min).
- Cleaning & maintenance scheduling — coordinating your Comfy Life cleaning and a backup vendor network.
- Damage control & AirCover claims — we file and manage claims to protect your owners' assets.
- Listing optimization — copy, photos guidance, and content to lift conversion.
- DTCM guest registration — you obtain each unit's permit; we handle all subsequent guest registrations.
- Guesty PMS management — the platform our team runs fastest on.

Retained by you: dynamic pricing.

Damage & AirCover Claims — 70 / 30

Claims are handled separately from the monthly management fee. On any damage or AirCover claim we recover, we work on a **70 / 30 basis** — **70% to you, 30% to VirtuPro**. We only earn on claims we successfully file and recover, so our incentive is fully aligned with protecting your owners' assets.

Per-Unit Pricing — Built to Scale With You

We're waiving our standard 10-unit minimum and pricing per unit, so the partnership is viable from the pilot and rewards you as you grow. Additional units are always billed at the lower band rate — scaling only ever reduces your blended cost per unit.

Portfolio size	Per unit / month	Applies to
1–3 units	650 AED	Pilot & early growth (through Sep)
4–10 units	550 AED	Units 4 through 10

11–25 units	450 AED	Units 11 through 25
26+ units	350 AED	Units 26 and beyond

Minimum monthly engagement. Our standard floor to run a portfolio is **3,000 AED / month**. For you we'll bring that down to **2,500 AED / month**. Alternatively, you're welcome to hold off and start with us once a few units are onboard, so the per-unit fees above stand on their own — whichever you prefer. Cleaning and maintenance are billed at cost as a pass-through (Comfy Life ~210 AED per 1-bed — Dave is negotiating a preferred rate) and are separate from the management fee.

Why This Beats Building It In-House

To match our 24/7 coverage on your own, you'd be staffing **three 8-hour shifts** of in-house people. That works out to a materially **higher monthly cost — for less expertise**: you'd be paying full salaries for generalists still learning the tools, instead of tapping a trained team that already runs this operation at scale every day. With VirtuPro you get the round-the-clock coverage and the expertise, at a fraction of a three-shift payroll.

Your Growth Roadmap — and What It Costs

Milestone	Units	Indicative monthly fee
Now — pilot	1	2,500 AED (minimum engagement)
1 September 2026	3	2,500 AED (minimum engagement)
End of 2026	15–20	~8,000–10,300 AED
2027	~50	~21,000 AED

Indicative fees on the per-unit bands above, subject to the minimum monthly engagement while the portfolio is small. As the mix shifts to larger apartments and villas, we'll confirm any villa-specific scope together.

Pilot & Onboarding Workflow

Step	What happens	Owner
1 · Property Information Sheet	Lockbox, Wi-Fi, access, house rules and unit details captured up front	Sem
2 · Account access	Direct Airbnb login (not co-host) so everything stays under your brand	Sem
3 · PMS setup	Unit onboarded into Guesty	VirtuPro
4 · DTCM permit	Permit obtained per unit; we handle all guest registrations thereafter	Sem → VirtuPro
5 · Shared WhatsApp group	You added as admin — active during the pilot, then delegated to your admins	VirtuPro
6 · Go-live	Pilot unit live; we refine workflows before the September scale-up	Both

During the pilot you stay close in the WhatsApp group to learn the workflow; we'll add approval parameters (e.g. discount ranges) to the onboarding sheet so your admins can fully delegate as you scale.

We're excited to be the engine behind your growth — the same operation that runs 250 units for a group in Belgium and 67 for an operator in Dubai, working quietly behind your brand.
