

LISTING OPTIMIZATION AUDIT

Airbnb Portfolio Deep-Dive Audit

A listing-by-listing review of 7 short-term rentals operated under the **Cloud Breeze Holidays** brand across Sharjah & Dubai — what's wrong, why it matters, and exactly what to fix.

PREPARED FOR

Cloud Breeze Holidays

DATE

22 August 2026

LISTINGS REVIEWED

7 (4 Sharjah · 3 Dubai)

METHOD

Rendered live listing data

Scope note: Findings are drawn from each listing's public page data (title, structured facts, amenities, house rules, description copy, host profile, review scores, photo counts). Nightly pricing and cancellation terms are only exposed by Airbnb once trip dates are entered, so price-competitiveness is flagged as a follow-up rather than scored here.

The headline

The portfolio is fundamentally healthy — a Superhost brand with strong ratings on the established Sharjah units. But every listing carries **content-hygiene defects** that quietly erode trust and conversion, and four listings contain **internal operational notes that were never meant to be public**. These are fast, high-impact fixes.

4

Leaking internal data

6

Amenity/copy
conflicts

3

New, 0-review listings

● The five things to fix this week

1. **Scrub leaked internal references.** Four listings publicly expose internal codes and a Google Drive note — RA1-811, ALM-SOB-MRSKJ, ALB-BIN-0K7UT, and "view ... photos in the shared Google Drive." Delete all of it.
2. **Fix the "Pets allowed" flag on all four Sharjah units.** The amenities say pets are welcome; the descriptions say "No pets." Guests will book on the amenity and arrive with a dog.
3. **Correct the "Hot water = unavailable" checkbox** on cb4-1, cb1-8, cb3-2 & cb7-1, and add the **missing smoke & CO alarms** on cb7-1 — a safety-filter and trust problem.
4. **Resolve bed-count contradictions** (cb4-1 says "4 beds" but is configured for 3; room1 says both "King" and "three queen bedrooms").
5. **De-duplicate the two Dubai 3-bedroom listings** (room1 / room2) — near-identical copy split across two host accounts, with room2 carrying the wrong unit's code.

⚠ A structural issue worth a decision

The seven listings run under **two different host accounts that share the same display name** — one with 407 reviews / 6 months hosting, one with 10 reviews / 5 months. Splitting inventory (including the two nearly identical Dubai 3-BRs) across accounts **fragments your review authority and Superhost signal**. Consolidating onto the stronger account would lift the newer listings' ranking from day one.

02 — PORTFOLIO AT A GLANCE

All seven, side by side

Ratings are strong where reviews exist; the weakest performer is cb3-2 (4.45, cleanliness 4.4). Photo depth and amenity completeness are inconsistent across the set.

LISTING	CITY	CONFIG	GUESTS	RATING	REVIEWS	PHOTOS	HOST ACCT	TOP FLAG
cb4-1 Top-Floor 2BR, Alef Al Mamsha	Sharjah	2BR · 3 bed · 2 ba	6	4.77	22	79	A (407)	Leaked notes
cb1-8 The Minimal Beauty	Sharjah	1BR · 1 bed · 1 ba	3	4.69	16	33	A (407)	Studio vs 1BR
cb1-9 Oak Luxury 1BHK	Sharjah	1BR · 1 bed · 1 ba	3	4.71	21	57	A (407)	Pets conflict
cb3-2 Luxury 1BR, Al Mamsha	Sharjah	1BR · 1 bed · 1 ba	4	4.45	11	56	A (407)	Low cleanliness
cb7-1 Perfect City Studio	Dubai	Studio · 1 bed · 1 ba	2	New	0	40	B (10)	No smoke/CO alarm
room1 Luxe 3BR Burj Khalifa View	Dubai	3BR · 3 bed · 4 ba	6	New	0	107	A (407)	Leaked code
room2 Elegant 3BR Haven	Dubai	3BR · 3 bed · 4 ba	6	New	0	88	B (10)	Wrong code + dup

Host account A = "Cloud Breeze Holidays" profile showing 407 reviews · 4.73 avg · 6 months hosting · 97% response. Account B = same display name, 10 reviews · 4.8 avg · 5 months · 100% response. Both are Superhost-badged and verified.

Category ratings — where guests dock points

LISTING	CLEAN	ACCURACY	CHECK-IN	COMMS	LOCATION	VALUE
cb4-1	4.8	4.9	4.6	4.9	5.0	4.7
cb1-8	4.9	4.9	4.8	4.9	4.9	4.7
cb1-9	4.8	4.8	4.8	4.7	4.9	4.8
cb3-2	4.4	4.6	4.7	4.6	4.6	4.6

Accuracy scores in the 4.6–4.9 band are consistent with the copy/amenity mismatches flagged in this report — guests notice when the listing over-promises. Fixing accuracy issues typically lifts this sub-score fastest.

The detail

Each listing below lists its verified defects with a severity tag and the specific fix. **Critical** = trust/safety/data-leak. **Fix** = accuracy or conversion. **Polish** = quality & ranking.

cb4-1 — Stunning Top-Floor 2BR, Alef Al Mamsha
Sharjah ·
rooms/1614475202657875469

2 BR · 3 beds · 2 baths
6 guests
★ 4.77 (22)
79 photos
Acct A

Critical

Internal Google Drive note is public. The description twice tells guests to "view RA1-811 photos in the shared Google Drive." This exposes an internal file-management workflow and an internal code.

"...without the premium price (view **RA1-811 photos in the shared Google Drive** for a full visual tour)."

→ **Delete both references. Guests never see your Drive.**

Critical

Exact address published. The copy prints the building plus-code and street: "8F59+557 on Khalid Bin Sultan Al Qasimi Street." Airbnb deliberately hides the precise address until a booking is confirmed. → **Remove the plus-code/street; keep it to neighbourhood ("Muwaileh Commercial").**

Fix

Bed count contradicts the listing. Copy repeatedly says "4 comfortable beds / 4 beds," but the listing is configured as **3 beds**. → **Either update the bed configuration to 4 (and add the 4th to the sleeping-arrangement) or change the copy to 3.**

Fix

"Pets allowed" × "No pets." Amenities flag **Pets allowed**; the house-rules copy says "No parties, smoking, or pets." → **Decide the policy and make the amenity + text agree.**

Fix

Checkout time conflict. House rules say **Checkout before 12:00 PM**; the description says "check-out by 11 AM." → **Align to one time.**

Polish

"Hot water" listed as unavailable (alongside Dryer). For a luxury apartment this reads as an error and can filter you out of searches. → **Toggle Hot water on if the unit has it.**

Polish

Typo in "Things to note": the section opens "**heck-in/out:**" (missing the "C"). → **Fix to "Check-in/out."**

Strengths: 5.0 location, rich 79-photo gallery, strong all-round scores.
7 issues

cb1-8 — The Minimal Beauty W/ Balcony

Sharjah · rooms/1618225675284148345

1 BR · 1 bed · 1 bath

3 guests

★ 4.69 (16)

33 photos

Acct A

Fix

"Studio" vs "one-bedroom" — pick one. The listing is configured as a 1-bedroom, but the copy calls it a "modern studio," a "studio," a "suite" and a "one-bedroom sanctuary" in the same text.

"...The Minimal Beauty, a sleek **one-bedroom** sanctuary ... This modern **studio** features a private balcony..."

→ **Standardise on the true layout so guests know what they're booking (accuracy driver).**

Fix

"Pets allowed" flag is on, with no mention (and the brand's other units say "no pets"). → **Confirm and align.**

Polish

Thinnest gallery in the portfolio — 33 photos. Siblings run 56–107. Fewer photos = lower conversion and weaker ranking. → **Add 15–25 photos (every room, balcony, pool, kitchen details, workspace).**

Polish

"Hot water" flagged unavailable, and no **Dedicated workspace** amenity despite copy selling "catching up on work." → **Correct hot water; add workspace if a desk exists.**

Strengths: best-in-set category scores (4.9 clean/accuracy/comms).

4 issues

cb1-9 — Luxury 1BHK "Oak Luxury"

Sharjah · rooms/1618262986743901210

1 BR · 1 bed · 1 bath

3 guests

★ 4.71 (21)

57 photos

Acct A

Fix

Title jargon "1BHK". "BHK" is real-estate shorthand most international guests don't parse, and it breaks the naming pattern of your other titles. → **Rename to plain language, e.g. "Luxury 1-Bedroom with Pool & Prime Location."**

Fix

Amenity claims not backed by the amenity list. Copy promises an "outdoor playground" and "24-hour security," but neither appears in the listing's amenities. → **Add the amenities if true, or drop the claims (accuracy).**

Fix

"Pets allowed" flag on with no supporting policy. → **Align with your standard pet policy.**

Polish

Truncated sentence. The space paragraph ends mid-thought: "...a seamless blend of home comfort and hotel-quality luxury" with no full stop. → **Proofread & close the sentence.**

Strengths: most complete amenity list of the Sharjah 1-BRs; solid scores.

4 issues

1 BR · 1 bed · 1 bath

4 guests

★ 4.45 (11)

56 photos

Acct A

Critical

Weakest performer — 4.45 overall, cleanliness 4.4. This is the lowest score in the portfolio and cleanliness is the biggest drag. Low cleanliness is the single most damaging sub-score for future bookings. → **Audit the turnover/cleaning process for this unit; consider a deep clean and a checklist reset before the next stays.**

Fix

Sleeps 4 but only 1 bed configured. A 1-bed/1-BR set to 4 guests implies a sofa bed or extra bedding that isn't shown in a sleeping arrangement. → **Add the actual sleeping surface (sofa bed / extra bed) so the "4 guests" is believable.**

Fix

"Pets allowed" flag vs. house-rules intent. → **Align.**

Polish

"Hot water" flagged unavailable. Same likely checkbox error. → **Correct.**

The three Dubai listings

All three are new with zero reviews, so first impressions carry the entire booking decision — which makes their content defects more costly, not less.

cb7-1 — Perfect City Studio GetawayDubai · rooms/1744758644002350478

Studio · 1 bed · 1 bath

2 guests

★ New

40 photos

Acct B

Critical

Safety amenities missing. Both **Smoke alarm** and **Carbon monoxide alarm** are marked unavailable (plus Heating & Hot water). Missing safety devices dent guest trust and can suppress you in filtered search. → **Install/confirm detectors and switch the amenities on; correct hot water.**

Critical

Internal code as the "guest access" text. The "what guests can access" field is literally the internal string `ALB-BIN-0K7UT` . → **Replace with a real description of what the guest gets (whole studio + shared building facilities).**

Fix

Thinnest description in the portfolio. Two short generic paragraphs — no neighbourhood, no highlights, no distances. New listings need *more* copy, not less. → **Expand: location, transport, what's nearby, who it suits.**

Polish

House rules incomplete — no party/smoking/pet rules set, unlike the Sharjah units. → **Add standard house rules.**

On host account B (10 reviews) — see consolidation note.

4 issues

- Critical

Internal code leaked as the guest-access text: ALM-S0B-MRSKJ . → Replace with real access description.
- Fix

Bed types contradict within the copy. Sleeping arrangements say "Bedroom 1 — King, Bedroom 2 — Queen, Bedroom 3 — Queen," but a later paragraph says "three queen bedrooms." → State the real bed types once and match the structured beds.
- Fix

"Burj Khalifa View" in the title is unproven in the body. The description only says "beautiful views" and "4 km from Burj Khalifa." A view claim in the title that photos/copy don't confirm is an accuracy risk. → Either show the view in photos + copy, or soften the title.
- Fix

Checkout time missing from house rules. Unlike the other units, no checkout time is set. → Add "Checkout before 11:00/12:00."
- Polish

Near-duplicate of room2 (see below). → Differentiate or consolidate.

3 BR · 3 beds · 4 baths

6 guests

★ New

88 photos

Acct B

Critical

Wrong internal code — pasted from another unit. The guest-access text is ALB-BIN-0K7UT — the *same* code that appears on cb7-1 (a Dubai *studio*), not this 3-bedroom. Clear evidence of copy-paste duplication. → **Remove entirely and write real access copy.**

Critical

Duplicate content with room1. The description is essentially identical to room1's (same "Crest Grande, Sobha Hartland" body, same neighbourhood paragraphs). Two live listings with the same copy compete against each other and read as templated. → **Rewrite unique copy, or list once and consolidate.**

Fix

Under-listed amenities vs. its twin. Compared to room1, room2 is *missing* Refrigerator, Bed linens, Dishes & silverware, Cooking basics, and Clothing storage from its amenity list — for a 3-BR sleeping 6, these are exactly the boxes guests filter on. → **Add the missing amenities (they almost certainly exist).**

Fix

Title promises a "Dedicated Office" the copy doesn't develop. The body is the generic room1 text. → **Add a paragraph on the office/workspace to earn the title.**

Themes across the whole set

Several defects repeat across listings. Fixing them as templated standards — not one listing at a time — is faster and prevents recurrence on the next unit you onboard.

🔴 Data-hygiene leaks

Internal references reached the public page on **4 of 7** listings: a Google Drive note and internal unit codes (RA1-811, ALM-SOB-MRSKJ, ALB-BIN-OK7UT). One code was even pasted onto the wrong property.

Root cause: descriptions drafted in an internal template and published without a scrub step.

⚠️ Amenity checkboxes vs. reality

"Hot water" is marked **unavailable** on 4 units; "Pets allowed" is on across all 4 Sharjah units against a "no pets" narrative; cb7-1 is missing smoke/CO alarms. These are the checkboxes Airbnb *filters* on.

Impact: silent exclusion from filtered searches + accuracy complaints.

⚠️ Two host accounts, one brand

Inventory is split across a 407-review account and a 10-review account sharing the name "Cloud Breeze Holidays." The new Dubai units are split between them.

Recommendation: consolidate onto the established account to concentrate review authority & Superhost signal.

📄 Templated, AI-flavoured copy

Descriptions lean on repeated superlatives ("luxury," "sanctuary," "sophisticated") and share whole paragraphs. A couple trail off mid-sentence or contain typos.

Fix: one proofread pass + genuine per-unit specifics (views, floor, walk times).

✅ What's working — keep doing it

- **Superhost status, 97–100% response, "within an hour"** — excellent operational signal.
- **Strong ratings on established units** (4.69–4.77) with a standout 5.0 location on cb4-1.
- **Deep photo galleries on the flagship units** (room1 107, cb4-1 79) — the model to bring the thin ones up to.
- **Consistent self-check-in + smart-lock** across the portfolio — a genuine convenience selling point.

Not assessed here (needs trip dates or owner input)

- **Nightly price & competitiveness** — Airbnb only reveals rates once dates are entered. Recommend a separate pricing review vs. comparable Sharjah/Sobha Hartland units, plus a launch discount + first-3-bookings strategy for the new listings.
- **Cancellation policy** — shown only with dates; confirm it's consistent and appropriate across the set.
- **Actual in-unit condition** — the cleanliness signal on cb3-2 is inferred from guest scores, not inspected.

What to do, in order

Sequenced by impact-per-effort. Items 1–3 are same-day fixes that remove real risk; 4–6 lift conversion; 7–8 are strategic.

- 1 **Scrub all internal references** from cb4-1, cb7-1, room1, room2 — Google Drive note, plus-code address, and the three internal codes. **Critical · today**
- 2 **Fix safety & amenity checkboxes** — add smoke/CO alarms on cb7-1; correct "Hot water = unavailable" on the 4 affected units. **Critical · today**
- 3 **Resolve the pets conflict** on all 4 Sharjah units — set one policy and make amenity + text agree. **High**
- 4 **Fix factual contradictions** — cb4-1 bed count & checkout time; room1 king/queen & missing checkout; cb1-8 studio-vs-1BR; cb3-2 sleeps-4 sleeping surface. **High**
- 5 **De-duplicate room1 / room2** — write unique copy and complete room2's amenity list, or consolidate to a single listing. **High**
- 6 **Lift the thin listings** — expand cb7-1's description; add 15–25 photos to cb1-8. Proofread every description (fix "heck-in/out", 1BHK title, truncated sentences). **Medium**
- 7 **Address cb3-2 cleanliness** — process/deep-clean review to protect the rating before it compounds. **Medium**
- 8 **Decide on account consolidation** and set a launch/review-generation plan for the 3 new listings (pricing, first-booking incentives, post-stay review requests). **Strategic**

Expected payoff

Items 1–4 alone remove every trust and accuracy risk in the portfolio and should lift the "accuracy" sub-score (currently 4.6–4.9) on the established units. Items 5–8 give the three new Dubai listings a materially stronger launch — cleaner copy, complete amenities, and the review authority of your main account behind them.
